### ABOUT DUCHENNE MUSCULAR DYSTROPHY

This disease is the leading lethal genetic disorder of children worldwide. It is a progressive muscle disorder that causes the loss of muscle function and independence. Boys affected by Duchenne lose the ability to walk between the ages of 8 and 12, require respiratory support by their late teens and survive only into their twenties.

### OUR MISSION

The mission and vision of Pietrosfight.org is to increase worldwide awareness of DMD, while raising and appropriating research funds. Pietrosfight.org is focused on supporting potential therapeutics and better testing platforms that develop Duchenne compounds. This is our Mission of Love, our Fight for a Cure.
